flexibility is our strength

The Rowley Range by BGID

The very best of side hinged garage door systems

Side Hinged Steel Garage Doors

The **Rowley Range**, steel side hinged doors, now benefit from a significantly improved form of construction. This allows BGID to provide these new doors with an inner skin, which substantially improves aesthetic values, adds to panel integrity without weight penalty and without a price disadvantage over our earlier doors.

Inner Door Skin now as Standard

The **Rowley Range**, steel side hinged garage doors, are normally fitted within BGID's own unique cold rolled, rebated section, galvanised steel frame, incorporating as standard, a zinc plated and powder coated finished **full height continuous hinge**.

Where the doors are to be fitted into a timber frame, BGID supply 3x 100mm (4") galvanized steel butt hinges – these are also powder coat paint finished to match the door panel colour.

Door Styles

Door Openings

The first opening, or access door, is supplied as standard with a Rim Nightlatch and 2 x keys with brass face and convenient matching brass finger pull. The closing edge of this door and the adjacent panel are both provided with cloaking strips for enhanced security.

The slave, or second opening leaf, is offered, as standard, with the option of either Bi-Fold action or Fixed. It is then fitted with the appropriate number of 150mm **sprung action, chain operated, top bolts** and 150mm **foot operated, bottom bolts** providing security and convenience.

All sets of **Rowley Range** garage doors are supplied, as standard, with a pair of **overhead door stays** to conveniently and securely hold the doors open at 90°.

Powder Coating

All **Rowley Range**, steel side hinged garage doors and frames are supplied fully powder coat paint finished. The whole process taking place at BGID's own in-house continuous process powder coat paint plant.

White is our most popular colour, but BGID offer a further extensive range of standard colours at no additional cost. Even a white frame with a coloured door is no problem to BGID and again does not incur additional charge.

BGID normally supply the powder coat paint in a textured finish, but matt and semi-gloss are available in most colours, but check before ordering.

The very best of side hinged garage door systems

As individual as you are!

Every **BGID Rowley Range**, side hinged garage door is made to measure – please see our **Opening Details** information for the normal overall size range – however; here at BGID we believe *flexibility is our strength* we can, and often do, work outside the limitations shown.

BGID have the unique ability to manufacture, supply and install if required, either directly or through a network of approved specialist garage door installers – **Rowley Range**, side hinged doors, purpose made to suit individual customer requirements....

Extra height doors to accommodate tall vehicles or caravans – indeed extra width doors where required can be arranged – separate, but matching access doors – doors with glazing with BGID's unique JB cassette Window System – fixed as well as opening panels – non standard powder coat paint colours...

For the very best – and for complete flexibility, whatever your garage door requirements – give BGID a call, the side hinged garage door specialists.

flexibility is our strength

Fitted with a cat flap - an unusual extra

A double width opening

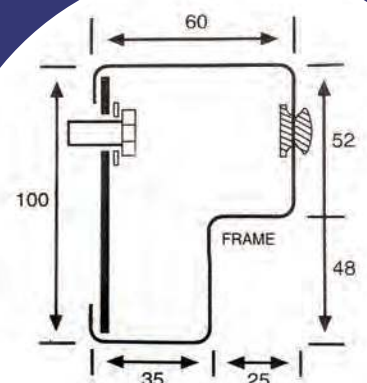

Fitted with JB Window Cassette System

Not for BGID, the lightweight box section frame favoured by other manufacturers - BGID use a purpose made galvanized steel, industrial security quality, 2mm thick cold rolled rebated section, with mitred and internally welded corners to provide an immensely robust frame.

The frame is pre-drilled, and includes, fixings for both timber and brickwork and is ready to accept BGID's unique full height continuous hinge system.

Opening Details

Size Range Chart

No standard sizes - all doors are made to measure

Two Thirds & One Third split: Brickwork Opening

Opening	Min	Max
Width	5' 11 1/4" (1810)	9' 8 1/2" (2960)
Height	6' 1 3/4" (1873)	7' 1 3/8" (2170)

Half & Half Split: Brickwork Opening

Opening	Min	Max
Width	7' 9 3/4" (2380)	11' 2 1/2" (3416)
Height	6' 1 3/4" (1873)	7' 1 3/8" (2170)

The information above is based on using BGID's own steel frame - where a timber frame is used (not by BGID) these dimensions may alter.

Options

- Doors are normally supplied with BGID's own rebated section steel frame, but can be supplied ready to fit within a timber sub-frame (not by BGID)
- Flashing to cover exposed brickwork or unsightly gaps can be supplied manufactured from galvanized steel, and powder coat paint finished to match the frame
- Access doors, whether separate, or part of the garage door, can be right hand or left hand, or in some cases centre opening
- Mortice Locks with lever handles; mortice dead locks, extra security bolts, letter plates, even cat flaps are available
- Choice of leading styles where windows are incorporated
- Choice of powder coat paint finish
- Doors are normally arranged to open out, but opening into the garage is an option
- Door and frame units are normally fitted between brickwork, but can easily be fitted to the outside face to maximise drive through width and height.
