4 JDUK DOOR SYSTEMS

Why WIŚNIOWSKI?

For the last three decades, we have been working in accordance with the idea of the founder of the WIŚNIOWSKI brand, Andrzej Wiśniowski, who made it his goal to create innovative products addressing all of our customers' needs, providing many reasons to buy WIŚNIOWSKI products:

- Side Sprung available up to 5000mm wide
- Matching profiles provided as standard
- 4 Panel arrangement up to 2375mm high
- 100mm headroom including the tolerance required for the automation
- Unique fascia specifically designed for the UK
- 34 standard RAL colours available
- 41 foiled finishes available
- Exclusive Home Inclusive colour range
- **Special** colours available on request, from Farrow & Ball to Little Greene Paint.

Perfection in every detail

UniPro

Always universal

Thanks to advanced technologies, proven materials and our own innovative technical thinking, we give our customers the certainty of a good choice. We have an integrated Management System, certified on the basis of the quality standard ISO 9001: 2008 and Occupational Health and Safety OHSAS 18001:2007. This is striving for continuous improvement of processes and products. The UniPro combines precision manufacturing and attention to detail with a vast range of designs, structures, colours, and decorative motifs. This lets you match the UniPro garage door with both modern and traditional buildings. Thanks to the multitude of design solutions, the UniPro garage door is the perfect choice for a new build or renovation,

STANDARD CLASS

- Side extension springs available up to **5000mm** wide
- Coloured profiles supplied as standard
- 4 panel arrangement up to 2375mm high
- Headroom requirement including automation 100mm
- 34 Standard RAL colours to choose from
- Panel heat transfer coefficient Up=0.48 W/m²K (1)

Matching profiles supplied as **standard**

Pre-installed cable system

Profile systems - Supplied as standard

Renovation is all about adapting the functionality of the current building to the needs of its users. The aim of the refurbishment is usually to improve the aesthetic quality of the building. Our profile systems let you install sectional garage doors in the garage opening regardless of the building conditions, even if the building has no lintel or side clearance. Enhance the functionality and the look of your garage with our profile solutions. Profiles to match all colours and foiled finishes are supplied as standard.

Functionality and

reliability that lasts

We insist on implementing solutions that extend the life of our garage doors at the initial design stage. Our TÜV SUD certificate guarantees that all the processes are strictly supervised along each stage, from the purchase of raw materials, through design and manufacture, up to the final product and customer support. It is a promise of the highest quality, safety, and comfort at each stage of use. A 10 year warranty covering the safe and reliable operation of the product is provided once registered to the extended care warranty programme. Would you like to find out more about controlling your home features using a smartphone? The smart CONNECTED technology brings WIŚNIOWSKI automatic sectional garage doors to the next level of product development, tailoring them to the requirements of modern customers. On the one hand, it lets you control the devices with your smartphone, and on the other, it gives you full control and lets you stay in touch with your home from any place in the world.

Anti-burglary safety kit RC2

UNIPRO PROFILE SYSTEM

The UniPro profile system is our response to the needs of buildings intended for renovation. The structure is made of door frames adapted for installation in openings without the lintel or side clearance or with uneven wall surface. This structure comprises a fascia panel system in the same colour as the door leaf, which ensures great appearance without the need for further finishing works.

The UniPro profile system solves a multitude of potential issues that could occur during the replacement of the garage door. The structure is mounted directly to the existing surfaces with a system of angle bars which, paired with fascia panels, take over the functionality of the missing wall elements.

Sectional door

Installation structure

It is a modern and functional solution enabling the installation of sectional garage doors regardless of thebuilding conditions in your garage. It acts as a framework and replaces the missing elements of the lintel or the side area where the structural elements of the garage door are mounted. The structure is made of corrosion resistant galvanised steel and because fascia panels can be used in the door opening, the garage entrance maintains great appearance.

Renovation

Cladding panels

This solution makes it possible to match the front of the building with the design of the garage door curtain. A perfect solution for owners of multi-car garages who appreciate a uniform style of buildings with a garage integrated with the building structure.

Renovation

Fascia panels

The garage door opening can be damaged in the process of replacing the garage door. Fascia panels matching the door leaf colour can be used to cover up the damage or some less appealing building structure features.

Finishing thermal

Seal

Makes it possible to provide an aesthetic finish of the garage opening thermally insulated, for example, with a layer of polystyrene or Styrodur, by eliminating the clearance between the thermal insulation layer and the door leaf surface, which improves thermal insulation. Available for torsion doors only.

FORM AND **FUNCTION**

UniPro sectional garage doors by WIŚNIOWSKI are manufactured using 40mm thick insulated panel. All our panels are manufactured in the WIŚNIOWSKI facility using state-of-the-art technological lines, which ensure high quality and repeatability at each stage of the manufacturing process. High technical parameters and reliable corrosion protection are obtained thanks to the use of high grade, galvanised steel with paint or film coating. The stiff polyurethane foam core ensures optimum strength for the panels and improves their thermal insulation. Special solutions, such as the 5-layer sheet bending system ensures stable fastening of elements, which further increases the strength of our design.

AN ABUNDANCE OF COLOURS

Colour is the first feature our senses react to. We made sure that each of our customers can find the colour they are looking for. Our garage doors can be manufactured in RAL palette colours and in wood effect finishes. Together with our range of structures and extra decorative elements, this gives you hundreds of options for a totally bespoke design.

Standard RAL, special RAL and Non RAL colours available
Wide selection of wood effect and coloured foils available pages 30-33
Exclusive - Home Inclusive 2.0 available pages 34-35

METRO DRIVE

METRO is a new generation of drive units. It is a harmonious combination of power, beauty, and reliability, designed using state-of-the-art technology. It is the result of cooperation between WIŚNIOWSKI and Somfy, a leading global manufacturer of automation products and smart control solutions for home devices. The METRO drive features exceptional technical parameters in an enclosure designed according to the WIŚNIOWSKI design principles.

(1) Control with no feedback. (2) Only with Set & Go

emote control

is a modern, safe, and reliable radio technology by Somfy that lets you control your devices compatible with the smart home concept. Thanks to this technology, the drive unit not only receives commands from controllers, but it can also send feedback. The io-homecontrol technology makes it possible to connect the Metro SMART io drive to the TaHoma and smartCONNECTED Box system, which provides the drive homecontrol° with additional functions that connect the garage door with smart devices available in your home.

PULSAR transmitter

four channel

Smartphone app

TREAT YOURSELF TO COMFORT AND SAFETY

- Control your garage door, gates, windows, and doors remotely
- Open garage doors and gates without touching your remote
- Manage your home via voice assistant

The SmartCONNECTED technology brings WIŚNIOWSKI automatic sectional garage doors to the next level of product development, tailoring them to the requirements of increasingly demanding customers. On the one hand, it makes it possible to control the devices with a smartphone, and on the other, it gives the users full control and lets them stay in touch with their home from any place in the world. io-homecontrol® enables wireless connection of the Metro SMART io drive unit to the smart home system controlled by the WIŚNIOWSKI smartCONNECTED Box and Somfy TaHoma Switch central control units. Building a comprehensive smart home provides a number of benefits and additional features that enhance your comfort every single day.

KEYPAD 2 RTS The two-channel code keypad makes it possible to control both drive units and radio receivers. Thanks to radio communication, they can be installed in

AUTOMATION ACCESSORIES

Extra features offered by the automatic garage door equipment equal higher safety standards and more comfort.

Set&Go by Somfy is a device that guides the user through all the configuration steps of the io-home control automatic operating unit. The device includes an antenna and a PC application.

KEYPAD 2 io lets you control the io radio drives and can support up to two devices. The keypad is a flush-mounted wireless device and no cables are required for installation. The device is powered with a battery and features backlit keys.

RTS wall-mounted transmitter
The three-channel transmitter
lets you control both your
drive units and radio
receivers thanks to radio
communication, they can be
installed in various locations

The external radio receiver lets you control the drive units using the Pulsar transmitter. It is a two channel device where you can program as many as 16 transmitters.

The mechanical carriage lock is an additional safeguard which increases garage door safety when mounted to the carriage.

Garage ventilation feature is enabled by tilting the top panel without the need to lift the door. The bottom panel remains seated against the floor.

Warning lamp compatible with the METRO drives.

Battery backup connected to the METRO drive provides power for several cycles of emergency operation.

External code keypad - this single-channel device can be used to control the garage door with a code. For outdoor installation, requires cabling.

Photocells prevent uncontrolled door leaf movement when an obstacle is present within the clear passage.

So - Opening width, ordering dimension.

Sj - Clear passage width after garage door installation.

Ho - Opening height, ordering dimension.

Hj - Clear passage height after garage door installation.

N - Minimum required lintel height.

W1 - Minimum required side clearance.

W2- Minimum required side clearance.

E - Minimum garage depth with clearance under the ceiling.

Ls - Drive rail length.
